Tuzla, 26 May 2020**

INVITATION

We invite you to participate at the jubilee 25th Summer University in Tuzla which will be held this year under the name eSummer@untz. This year, for the first time, the concept of the eSummer University of Tuzla (eLJUT) was designed as a series of online lectures from 1 to 5 June 2020.

The circumstances in which we live have raised a number of issues, dilemmas and uncertainties that are common to everyone in the world, and our idea was to try to make a brief insight into the reflections of academics from different scientific fields on issues that were popular even before the world pandemic, which will now leave a trace of collective knowledge about possible answers for the future.

Lectures will be held via Zoom app and will last for 15 to 20 min. Lectures are free and accessible to all interested participants (all generations, levels of education and professions). After the lecture, participants and teachers will be able to discuss about the lecture.

We hope that you will actively participate at the 25th Summer University in Tuzla 2020 and we invite you to share this information with as many people as possible, so that in these difficult times we can together create a space for new ideas and give opportunity and hope for the future.

Kind regards,

**Dr. Vesna Bratovčić,
Associate Professor
